SUMMARY

Computer Science undergraduate in Interactive Media and Game Development, and Frontend Lead on Genesis, a 7-person React web app. Has internship experience building responsive websites for business clients, and has built editor tools and game systems in C++ for a custom game engine. Interested in web development, game development, and interactive media.

EXPERIENCE

Web Development Intern | FindSGJobs.com, Singapore *Sep 2021 – Mar 2022*

- **Built and shipped responsive websites for 3 business clients** in HTML, CSS, and JavaScript, so each site worked on both desktop and mobile screens.
- **Ran user testing on client websites** to find bugs and usability issues, then fixed them through code changes and UI improvements before launch.
- **Managed code with a team of 4 on GitHub**, using version control to keep changes organised and avoid overwriting each other's work.

PROJECTS

Genesis (React Web App) | Frontend Lead, Team of 7 *Sep 2026 – Present*

- **Lead frontend development of a React web app** that turns photos of real objects into 3D models, building the camera capture, drag-and-drop upload, and video frame extractor pages linked to a Node.js backend.
- **Connected the media library to live backend data** instead of mock images, and added login and account pages.

SoulBound (Custom C++ Engine) | Audio Lead / Programmer *Aug 2025 – Apr 2026*

- **Designed and built the editor GUI** in C++ with Dear ImGui for an engine made from scratch with no built-in editor: an asset browser with drag-and-drop import and a live inspector for 4 component types.
- **Implemented backend game systems** including collision detection to stop entities clipping through levels, proximity audio, and soundsets for all 4 playable characters.

Breakout Blueprint (Tabletop Card Game) | Team of 4 *Jun 2025 – Aug 2025*

- **Designed the card layout and cardback in Figma** with reusable vector components and colour-coded headers, keeping all 40 cards consistent and easy to read.

Mega Maker Level Design | Individual, Exchange at DigiPen Bilbao, Spain *Jun 2026 – Jul 2026*

- **Designed and playtested 3 original platformer levels** (Easy, Medium, Hard), shaping difficulty through layout and pacing rather than just harder obstacles.

LEADERSHIP & ACTIVITIES

Badminton Club Member | Singapore Institute of Technology *2024 – Present*

- Actively participated in club activities, fostering teamwork, discipline, and time management alongside academic commitments.

EDUCATION

BSc (Hons) in Computer Science in Interactive Media and Game Development *Graduation: Sep 2028*
DigiPen Institute of Technology, Singapore
Relevant Courses: Software Engineering, User Interface and User Experience, Machine Learning, Mobile and Cloud Computing, Computer Graphics, Artificial Intelligence, Data Structures & Algorithms

Diploma in Game Design and Development *2019 - 2022*
Temasek Polytechnic, Singapore

SKILLS

Languages: JavaScript, HTML, CSS, C++, C, C#, Python, JSON
Frameworks & Engines: React, Node.js, Unity, Dear ImGui
Design & 3D: Figma, Autodesk Maya, Adobe Photoshop
Tools: Git, GitHub, Jira, Visual Studio, Visual Studio Code
Concepts: Frontend Development, UI/UX Design, Responsive Web Design, Editor Tools, Gameplay Programming, Level Design, User Testing
